Jan Wangrat

AI Engineer · LLM applications, backend and data

jan@wangrat.com
Milan, Italy / Warsaw, Poland
linkedin.com/in/jan-wangrat-b2b651236 · github.com/janwan2003

AI engineer building LLM products end to end: agents, evaluation, backend and cloud infrastructure. Three years of part-time industry experience at an ESG-analytics startup during my studies. Comfortable beyond code: product decisions, sales and marketing support, leading small teams.

EXPERIENCE

Neural Alpha, London — Data Engineer and Software Developer (part-time) — Jul 2023 – present

- Develop the backend, data pipelines and LLM agents of Responsible Capital, an ESG analytics platform covering 1.8M company disclosures.
- Built LLM extraction and Q&A pipelines with automated evaluation and cross-model verification, cutting the need for manual review.
- Sped up search and data pipelines by an order of magnitude and lowered cloud and CI costs.
- Introduced AI automation to the engineering team: scheduled coding agents, AI ticket triage and shared Claude Code skills.
- Worked with leadership on product, with sales on data coverage and with marketing on SEO; reviewed teammates' code.

Python · FastAPI · Dagster · MongoDB · Neo4j · LangGraph · AWS · Kubernetes

POLIMI DATA SCIENTISTS

Project Manager — ChatDDT, with AIDEA — Feb – Jun 2026

- Led a three-person team delivering a document-extraction system for industry partner AIDEA; owned planning, client communication and the engineering workflow.
- Benchmarked 15 extraction pipelines; the recommended setup reached ~93% field accuracy at about a cent per document. First author of the report.

Team member — Market Regime Detector, with BlackSwan Quants — Nov 2025 – Mar 2026

In a nine-person team, built the clustering baseline for an S&P 500 market-regime model; co-author of the resulting paper.

SELECTED PROJECTS

Robot fleet planner — League of Robot Runners 2026 — C++

Task assignment and path planning for up to 10,000 warehouse robots on a one-second budget; **2nd of 68 teams** on all three tracks.

TaxCompass — taxcompass.it — LangGraph, pgvector, Azure

AI tax assistant for foreign entrepreneurs in Italy that cites the law behind every answer; live, with 1,000+ visitors.

WeGoWhen — wegowhen.com — React, Cloudflare

Group trip planner used by 130+ people for 40 trips; no sign-up, eight languages.

Intelligent Job Management — MSc research project, Prof. Danilo Ardagna — Python, PostgreSQL

Deadline-aware scheduler for GPU clusters that profiles, migrates and resumes training jobs; runs on Politecnico's GPU servers.

RewAIre — industry capstone with ai71 — FastAPI, React

LLM pipeline that turns a company's interviews, emails and logs into an AI-adoption plan; team of three, owned the assessment layer and web app.

EDUCATION

Politecnico di Milano — MSc Computer Science and Engineering — 2025 – 2027 (expected)

University of Warsaw — BSc Mathematics (2025) and BSc Computer Science (2024) — 2021 – 2025

SKILLS

Languages Python, TypeScript, C++, SQL · **AI** LangGraph, LangChain, RAG, LLM evaluation, pgvector · **Backend, data** FastAPI, Dagster, MongoDB, PostgreSQL, Neo4j · **Cloud** AWS, Azure, Terraform, Kubernetes · **Spoken** Polish (native), English (C1+)

PUBLICATIONS

- *Gaussian HMMs and DTW Clustering for S&P 500 Volatility Regimes*. Co-author, SSRN preprint, 2026.
- *Structured Extraction of Italian Transport Documents and Invoices*. First author, technical report with AIDEA, 2026.
- *Lifelong Multi-Agent Pickup and Delivery in the League of Robot Runners 2026*. Sole author, draft.
- *NMR Spectral Component Estimation using Unbalanced Optimal Transport via Mirror Descent*. BSc thesis in Mathematics, 2025.
- *Language Server for the Duckling Programming Language*. BSc thesis in Computer Science, team of four, 2024.

AWARDS

- **2nd of 68 teams**, League of Robot Runners 2026
- **Finalist**, Polish Mathematical Olympiad (Mąkowski Award)
- Competed in the final round, Polish Olympiad in Informatics
- **1st place**, Hackarena 2.0 (2024) and 2.5 (2025); **3rd**, Hackarena 3.0 (2026)
- **3rd place**, Goldman Sachs Hackathon and AWS DeepRacer (2024)
- **21st**, Midnight Code Cup international final 2025
- Selected for Bending Spoons First Ascent 2025
